ROHS REGULATION 3 (EU 2015/863)- POSITION STATEMENT.

RoHS is a directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment, which was adopted in February 2003 by the European Union. The RoHS directive took effect on 1 July 2006 and this directive restricts (with exceptions) the use of ten hazardous materials in the manufacture of various types of electronic and electrical equipment.

It is closely linked with the Waste Electrical and Electronic Equipment Directive (WEEE) 2002/96/EC which sets collection, recycling and recovery targets for electrical goods and is part of a legislative initiative to solve the problem of huge amounts of toxic e-waste.

The passage of information up and down the supply chain is a key feature of **RoHS** and users should be able to understand what manufactures know about the restrictions involved in using hazardous substances and how to control their restrictions.

JD Photo Data are suppliers of Photo-Tools and the products we supply do not use substances that are listed in the RoHS directive. For that reason, JD Photo Data are not required to register any products, nor are we bound to the creation of data sheets.

In future, we will promptly inform our customers in accordance with **RoHS** - if any ingredient of our products, are classified as a particular concern of the European Union. As things stand, however, we do not expect that this will happen.

JD Photo Data pays special attention to long-term security and continuity of supply.

If you require any further information, please do not hesitate to contact me on fil@jdphotodata.com or +44 (0) 1462 452616
